**Correspondence: Hospital of St John & St Elizabeth 60 Grove End Road London NW8 9NH**  
March 2012

**Procedures undertaken**

**Common abdominal and peri anal conditions treated:**

- Irritable bowel syndrome (abdominal bloating)
- Haemorrhoids (piles)
- Anal fissure
- Fistulae in ano (peri anal sepsis)
- Pruritus ani
- Rectal prolapse (perineal recto sigmoidectomy & laparoscopic ventral rectopexy)
- Faecal Incontinence

**Diagnostic and therapeutic Colonoscopy and Endoscopy**

- Endoscopy
- Colonoscopy (diagnostic & therapeutic) including colorectal cancer (screening).
- EMR endoscopic mucosal resection
- Capsule endoscopy

**Laparoscopic surgery for general surgical procedures:**

- Inguinal (groin)herniae
- Anterior abdominal wall, umbilical and femoral herniae
- Laparoscopic surgery (general conditions) Gallbladder, Appendicitis

**Laparoscopic surgery for colorectal cancer & inflammatory bowel disease**

- Right hemi colectomy
- Anterior resection (AR)
- Ultra low anterior resection incorporating hand sewn colo anal anastomosis
- Ileo anal pouch procedure (restorative procto colectomy)
- Abdomino perineal (AP) resection

The latter four procedures are routinely undertaken as a 2 consultant procedure, in view of the complexity of the procedures
