May 2020

**Procedures undertaken**

**Common abdominal and peri anal conditions treated:**

- Irritable bowel syndrome (abdominal bloating) /
- Rectal bleeding Haemorrhoids (piles)
- Anal fissure
- Fistulae in ano (peri anal sepsis)
- Pruritus ani
- Rectal prolapse (perineal recto sigmoidectomy)
- Faecal Incontinence

**Diagnostic and therapeutic Colonoscopy / Endoscopy**

- Endoscopy
- Colonoscopy (diagnostic & therapeutic) including colorectal cancer (screening).
- EMR endoscopic mucosal resection
- Capsule endoscopy

**Laparoscopic surgery for general surgical procedures:**

- Laparoscopic Inguinal (groin) herniae
- Laparoscopic anterior abdominal wall, umbilical and femoral herniae
- Laparoscopic Cholecystectomy
- Laparoscopic Appendicectomy

**Laparoscopic surgery for colorectal cancer & inflammatory bowel disease**

- Laparoscopic Right hemi colectomy
- Laparoscopic Anterior resection (AR)
- Laparoscopic Ultra low anterior resection incorporating hand sewn colo anal anastomosis
- Laparoscopic Ileo anal J pouch procedure (restorative procto colectomy)
- Laparoscopic Abdomino perineal (AP) resection

The latter two procedures are routinely undertaken as a 2 consultant procedure, in view of the complexity of the procedures
